

# **Inventory Tool**

This optional tool is designed to help you track and manage stock and other selected Services.

# Inventory properties of a Service:

Inventory			
Default Vendor	xpedx	•	Nore Senice Properties
SKU	< Vendor Specific	Code >	in the Service Setup window
UPC	< Universal Produc	ct Code >	in the service setup window.
FSC	< Forestry Certific	ation Code >	
🔽 Track Inventory	Minimum Level Ream Quantity In Stock On Order	0 0 0	You can assign the Inventory Properties easily in the Inventory Setup window. See Page 3 for

## **Getting Ready**

#### **STEP 1: Turn Off the Tracking Option of All Services:**

The easiest method is to turn off the tracking option of all Services and then selecting the ones you want to track.

This will open the Inventory Setup/Adjust window and list all Active (not discontinued) Services:

Inventory - Setup/Adjust	10.00 B.			Read Read						×
All Departments				😭 S	ervice Prop	erties	Need Bre	akdown		<b>a</b>
Listed Active Services in All Departments										
Service Click here to set track options	Size	Vendor	SKU	Minimum Level	Ream Quantity	In Stock	On Order	Unit Cost	1	InStock Cost

Close Save Changes							🚯 Lis	ted: 339		0.00

Now, the tracking option is off for all Services. Next, you will select the ones you want to track.

#### STEP 2: Turn -On the Tracking Option of the Services you want to track:

In the scheduler window, select **Paper** from Departments and then select Setup from the Inventory menu.

Inventory - Setup/Adjust	March 10.			Sec. 10						-X	
Paper				😭 S	ervice Prop	erties	Need Bre	eakdown			)

In this window you will set and/or adjust the **Inventory Properties** of papers. The **Setup** list includes all **active** (not discontinued) papers. *See Options to set the "Sort Services by Vendor" option.* 

#### **Inventory Properties**

You may edit the following properties in this window or in "More Properties" window of a Service:

- SKU: Vendor Specific Code.
- Minimum Level: Minimum quantity you would like to have in-stock.
- **Ream Quantity:** Number of sheets of paper per ream. Printer's Plan will round-up the "Order" quantity to this.
- In-Stock: Current quantity you have.
- **On-Order**: Current quantity you have ordered but not received yet.
- Unit Cost: This value is read from the Run Table/First Row/Material Cost Column of Service.

The following properties are calculated:

- Item: Number of times a specific paper is assigned to jobs and not marked as "Done".
- **Need**: Number of sheets of paper needed (not marked as "Done") by jobs.
- In-Stock Cost = Unit Cost x Quantity-In-Stock. In other windows, this column becomes "Extended Cost" and its value is calculated based on Quantity Ordered or Received.

*Tip*: You may start using/testing this tool without setting up Inventory Properties.

## **Ordering Inventory**

In this window you will specify what and how many to order.

To open this window in the **Scheduler** section:

- a) Select **Departments / Paper** from the List Manager, then select **Order** from the **Inventory** menu.
- b) Or, right-click on a Service Quantity field and select **Selected Job** or **Selected Service** from the popup menu.

To open this window in the **Jobs** section:

- c) In the Job window, click **Inventory** button.
- d) In the Specs window, right-click on a Service and select **Check Service Inventory** from the popup menu.

The **Order Inventory** list includes the papers that are **To-Do** and Priority field is not marked as **On-Order** or **In-Stock**. *See Options to set the "In Order Inventory window, include Services of" option.* 

Inventory	Tente			×
Order		Service Properties	📃 Need Breakdown

After you click OK, Printer's Plan will:

- 1. Update the **On-Order** property of paper based on the quantity you ordered.
- 2. Update **Inventory History** by adding a record for each paper ordered.
- 3. Update the **Priority** field of Job Services as **On-Order** or **To-Order** or **In-Stock**.

#### **Receiving Inventory**

In this window you will specify what and how many you received.

To open this window:

• Select **Departments / Paper** from the List Manager, then select **Receive** from the **Inventory** menu.

The Receive Inventory list includes the papers you ordered. Priority field is marked as On-Order.

Inventory									1.						×
Receive								😭 Servic	e Prop	erties	📃 Need Br	eakdo	wn	l	à 📀

After you click OK, Printer's Plan will:

- 1. Update the In-Stock and On-Order properties of paper based on the actual quantity you received.
- 2. Update Inventory History by adding a record for each paper received.
- 3. Update the **Priority** field of Job Services as **On-Order** or **To-Order** or **In-Stock**.

## **Consuming Inventory**

When you mark a paper as **Done**, Printer's Plan will open this window for you confirm the actual stock quantity used. *See Options to set the "Open Quantity Used window" option.* 

Confirm Inventory Used	4	×
Writing: 24# (	Classic Laid	₽.
Click OK to mark pape	er as Done and save	In-Stock Now
In-Stock Was	5,200	
Less Quantity Used	1200	70 less than estimated 1,270
In-Stock Now	4,000	
	ОК	Cancel

After you click OK, Printer's Plan will:

- 1. Update the In-Stock property of paper based on the Quantity Used.
- 2. If you change the Quantity Used, update the Actual Material Quantity and Cost of Job.
- 3. Mark the paper as **done**. The Priority field remains unchanged.

# **History - List**

Select this from the Inventory menu to view the history of what you ordered and received.

Inventory	History						l l
Sorted by Vendor I	Name, Action Date						
Vendor	ActionDate	Action	Service	Size	SKU	Quantity	Cost
🔵 Kelly	01/05/2011	- Received	Offset: 60# Color	8.5 x 11		-10990	127.48
🕥 Kelly	01/05/2011	Ordered	Offset: 60# Color	8.5 x 11		10990	127.48
